

Open Data Types Project

The project/directory for this section is called data-types.

To open the Cargo project in VSCode, go to File > Open Folder.... Locate and select the data-types directory in the learn-to-code-with-rust course folder.

Alternatively, navigate to the project directory in Terminal/PowerShell and execute code .

Write your code in the src/main.rs.

Topics Covered in this Section

- Integers
- Floating-point values
- Booleans
- Characters
- Arrays
- Tuples
- Ranges
- The isize and usize Data Types
- Strings
- Methods
- Formatting Floats
- Casting/Converting Types to Others
- Mathematical Operations
- Augmented Assignment Operators
- Equality and Inequality
- AND Logic
- OR Logic
- Display Trait
- Debug Trait

- dbg! Macro
- Generics
